

NEW CAST IRON WHEEL

with bended spokes, naps and notches

Witte Lastrup INNOVATIVE - as ever

Witte Lastrup would like to introduce you the new cast iron corner wheel.

You think: Oh, cast wheels -

We know!

No!

This wheel is the only one on the market that actually meets the requirements for a stable and reliable corner wheel. The curved spokes press the feed outwards, the notches on the outer ring ensure that the

feed is returned to the conveyor line. The precisely formed naps on the wheel tread ensure that the wheel always rotates.

Witte Lastrup has invested in a high-quality casting technique - you can see that at first view. These specially shaped studs, which really fulfill their purpose, can only be found on the cast-iron corner wheel by Witte-Lastrup.

Talk to us, we look forward to your inquiry.
